

Introduced by Senator DeSaulnier

February 25, 2009

An act to amend Section 3722 of the Labor Code, relating to workers' compensation.

LEGISLATIVE COUNSEL'S DIGEST

SB 313, as introduced, DeSaulnier. Workers' compensation: penalty assessments.

Existing law requires every employer, except the state, to secure the payment of workers' compensation. Existing law provides that at any time that the director determines that an employer has been uninsured for a period in excess of one week during the calendar year preceding the director's determination, the director may issue and serve a penalty assessment order that requires the uninsured employer to pay to the director, for deposit into the State Treasury to the credit of the Uninsured Employers Fund, the greater of (1) twice the amount the employer would have paid in workers' compensation premiums during the period the employer was uninsured or (2) the sum of one thousand dollars (\$1,000) per employee employed during the period the employer was uninsured.

Existing law provides that if the employer is currently insured, or becomes insured during the period during which the above penalty is being determined, the amount an employer would have paid in workers' compensation premiums shall be calculated by prorating the current premium for the number of weeks the employer was uninsured.

Existing law provides that if the employer is uninsured at the time the above penalty is being determined, the amount an employer would have paid in workers' compensation premiums shall be calculated by applying the weekly premium per employee on file with the Insurance

Commissioner to the number of weeks the employer was uninsured. Existing law provides that each employee of the uninsured employer shall be assumed to be assigned to the governing classification for that employer as determined by the director after consultation with the Insurance Commissioner. Existing law provides that if the employer contends that the assignment of the governing classification is incorrect, or that any employee should be assigned to a different classification, the employer has the burden to prove that the different classification should be utilized.

This bill would require that, if the employer is currently insured, or becomes insured during the period during which the above penalty is being determined, the amount an employer would have paid in workers' compensation premiums shall be calculated by prorating the current premium for the number of weeks the employer was uninsured within the three-year period immediately prior to the date the above penalty assessment is issued.

This bill would also provide that if the employer is uninsured at the time the above penalty is being determined, the amount an employer would have paid in workers' compensation premiums shall be the product of the employer's payroll for all periods of time the employer was uninsured within the 3-year period immediately prior to the date the above penalty assessment is issued multiplied by a rate determined in accordance with regulation that may be adopted by the Labor Commissioner or, if none has been adopted, the average insurer rate per \$100 of payroll as reported in the most recent summary of the insurer uniform experience rating plan published by the rating organization designated by the Insurance Commissioner. The bill would delete the provisions regarding the governing classification to which each employee of an uninsured employer shall be assumed to be assigned.
